ABOUT US

IAS develops and delivers pragmatic and innovative solutions that span technology enablement, and management consulting disciplines to clients across the public and commercial sectors. IAS has demonstrated experience in successfully providing expert teams of professionals who bring uncompromising integrity, technical acumen, and real-world experience to deliver tangible outcomes.

CYBERSECURITY, COMPLIANCE & PRIVACY

Information Assured Solutions (IAS) delivers cybersecurity services to help clients prepare-for and respond-to global and local cybersecurity, compliance, and privacy challenges. Our products and services help clients assess cyber risks and security program maturity; and recommend and implement customized solutions to protect our clients' information assets that practically considers each organization's mission, people, processes, and technology.

IT PORTFOLIO MANAGEMENT

IAS delivers comprehensive IT Portfolio Management services, empowering clients to optimize technology investments. Our strategic guidance combines industry best practices and expert insights, aligning your organization's IT portfolio with business objectives. This results in cost reduction, enhanced efficiency, risk mitigation, and improved stakeholder confidence through transparent portfolio management.

DATA MANAGEMENT & ANALYTICS

IAS supports our clients with making data useful, available, and actionable. We support complex clients with functional diversity and disparate system environments. To overcome these challenges, we develop strategies and technologies that recognize interactions between business processes, organizational roles, and business objectives to assess outcomes, and support data-driven decision-making.

INTERNAL AUDIT, AUDIT READINESS, AUDIT REMEDIATION & AUDIT LIAISON/SUPPORT SERVICES

Information Assured Solutions (IAS) provides comprehensive support for federal agencies and other organizations seeking to strengthen and maintain compliance with audit and advisory requirements. Backed by years of hands-on experience and a commitment to excellence, IAS helps federal clients and other entities establish resilient internal controls, maintain operational integrity, and achieve measurable results in regulatory compliance. **OUR CORE CAPABILITIES INCLUDE:**

- **Internal Audits** (including assessments performed in accordance with OMB A-123 Standards & Guidance): Conducting thorough internal audits aligned with Office of Management and Budget (OMB) A-123 standards, ensuring robust internal controls and compliance across federal programs and financial operations.
- **Audit Readiness:** Preparing organizations for different types of attestations, including Financial Statement audits, Federal Information Security Modernization Act (FISMA) Audits, System and Organization Controls (SOC) attestations, etc., by identifying potential gaps, formulating and supporting the implementation of corrective actions, and reinforcing existing policies and procedures to help increase the likelihood of a favorable or improved audit disposition.
- **Advisory & Remediation Services:** Assessing and addressing findings from internal and external reviews, developing tailored remediation strategies, and guiding organizations through corrective actions to mitigate risks and strengthen overall governance. Based on any client's unique circumstance, IAS can assist with business process re-engineering, technology enablement solutions, or other strategies that may not have been pragmatically contemplated.

DEMONSTRATED SUCCESS

OFFICE OF THE UNDER SECRETARY OF DEFENSE (OUSD) - ADVANCING ANALYTICS (ADVANA)

IAS delivers enterprise support to OUSD and its strategic partners (i.e., DoD Fourth Estate, DoD Departments, and IC community) in the areas of Information Technology (IT) engineering, IT Portfolio Management, and Cybersecurity.

FEDERAL COMMUNICATIONS COMMISSION (FCC) - BROADBAND DATA COLLECTION SYSTEM DEVELOPMENT AND IMPLEMENTATION (BDC SDI)

IAS is supporting the development and deployment of the BDC and National Broadband Map. These projects aim to modernize and build upon the FCC's current data collection application by incorporating highly granular, location-based broadband deployment data.

MOZARK - FCC SPEED TEST APPLICATION

IAS delivers cybersecurity and management consulting services (including RMF/ ATO services), to Mozark for establishing a mobile application, available for Android and iOS, which measures and collects data on mobile wireless broadband availability and connectivity performance.
